PROJECTS

PURCHASE REQUEST SYSTEM (PRS)

- Angular SPA application that connects with both C# .NET with SQL database and Java web service backend with MySQL database.
- Application allows users to requisition supplies from a variety of vendors, subject to approval.

OTHER WEB API's

- Dinner Plan - Angular SPA application that connects with C# .NET RESTful web service with SQL database developed to help my family plan meals that everyone will enjoy for dinner.
- Began developing a web API for my kids to keep track of their trading cards with deck building for games like Pokemon, Magic, & Yu-Gi-Oh!

SPACE ADVENTURE (C# Console)

- Developed a C# Console game for my kids after they asked if I could create it.
- Incorporated story choices, casino games (slot machines & blackjack), and working on the Pazaak card game from Star Wars.

All Projects are on GitHub & my Personal Website showcases a few projects, links under contact!

SKILLS
